

## Maintenance & Care

For oiled items please note that they will need regular maintenance to keep them looking at their best. It is a quick and easy process. We suggest twice a year but please use your best judgement.

Wipe the pieces with a white cotton rag lightly soaked in oil and wipe away excess with a clean fresh rag.

Please ensure that you dry all used rags flat to prevent fire risk and dispose of as per manufacturer's safety instructions on the tin.

**If you are unsure which pieces are oiled and which are varnished please give us a ring.**

**Here are a few examples of oiled Hebe products -**

- Table and Bench Seat Legs
- Building Blocks and Dominoes
- Storage Boxes
- Writing Desk Compartments
- Diggers and Trucks
- Carpentry and Craft Tables
- Buckets and Wheelbarrows

Varnished products just need a buff with some Pledge now and again to keep them looking great. Please do not use abrasive cleaners. Isopropyl Alcohol is good for getting marks off.

**If you need an Oil Kit, including 250mls of Haarlem Danish Oil, gloves and rags, we sell them for \$35 ex GST and postage; please get in touch if you have any questions whatsoever.**

Enjoy!

The Team at Hebe.
